+254 769772146

or

+254 792744154

CAREER:

I started my career in computer education from 2021 to December 2022. During that period, I had the privilege of making an impact in society by teaching students how to code. It was a role I enjoyed deeply because the more I taught and helped the learners, the more I gained insight into the nature of effective communication.

I learned how to be patient with learners and how to adapt to their different abilities and skills. I also learned how to evaluate their competence levels and collaborate with supervisors to plan areas of improvement. The learners would often end up benefiting a lot from the vast array of teaching methods I employed.

EDUCATION:

I loved technology ever since I was a little kid. So, **I studied BSC. Information Technology** at Masinde Muliro University of Science and Technology.

- Date of Completion/graduation: December 2020.
- Score: Second class honors, upper division.
- I led a small hackathon group and taught java (prior to meeting python) to classmates after school.

Before I went to campus, I had been at **Butere Boys High School**.

- Completed in 2014.
- Scored a mean grade of C+.
- Computer studies was my all-time favorite subject.

My primary school was a local day school, I had to walk a kilometer daily to school, quite an experience.

It is called Emusunguri primary school.

- Completed in 2010.

- Scored 295/500.
- Developed a liking for computers at this stage.

TECHNICAL SKILLS:

- Git
- Flutter
- HTML
- JavaScript/Typescript
- CSS
- Node.js
- React.js
- Python

I'm also proficient in Linux, MacOS and Digital Audio Workstations.

I am fluent in:

- **English**
- **Swahili**

I write articles on the mind, the brain and artificial intelligence. You can find them

here: <https://droidbee.substack.com/>

Also, here is my GitHub repository: <https://github.com/Bravyn>

And a web app I have built: <https://model-marketplace.vercel.app/>
